PROFESSIONAL EXPERIENCE

Front-End Developer **Sept 2024 - Present**
Tektronix Technology Systems LLC. | Dubai, UAE

- Developed responsive Visitor Management System (VMS) using React.js, Tailwind CSS and TypeScript, delivering high-performance and scalable solutions.
- Integrated UAE PASS authentication and secure login flows, enhancing compliance with government security standards and strengthening user data protection.
- Implemented hardware integrations including RFID card readers, QR code scanners, and Emirates ID readers, automating visitor verification and accelerating check-in processes.
- Engineered an admin panel with role-based access control (RBAC), system configurations, and privilege management, streamlining operations and improving security.
- Designed real-time dashboards and dynamic email templates, providing actionable insights and automating communication workflows.
- Collaborated with backend teams to integrate RESTful APIs and third-party services, ensuring smooth data exchange and system interoperability.
- Optimized performance with code-splitting, lazy loading, and reusable components, reducing load times and delivering seamless user experiences.

Software Engineer **Jan 2023 - Aug 2024**
AppTycoons | Karachi, Pakistan

- Delivered responsive web and mobile applications using Next.js, React Native, and Tailwind CSS and TypeScript, enhancing performance and user experience.
- Developed and integrated RESTful APIs with React Query in Next.js, implementing state management with Zustand for scalable and maintainable solutions.
- Managed Prisma models and streamlined file storage with Cloudflare R2.
- Automated transactional emails with Mailgun, streamlining communication and reducing manual effort.
- Integrated third-party services including Stripe for payments with checkout sessions and webhooks, and Google Maps API for location-based features.
- Managed codebase versioning with Git/GitHub and guided junior developers through code reviews, ensuring collaboration and code quality.

Junior ReactJS Developer

Jan 2022 - Dec 2022

Agilelan Limited | Karachi, Pakistan

- Translated UI/UX wireframes into functional React.js frontend code, driving product usability and overall success.
- Collaborated with developers to create and enhance features, improving user satisfaction.
- Integrated frontend code with server-side APIs and services, ensuring smooth data flow and functionality.
- Implemented form handling and validations using React Hook Form and Yup, improving data accuracy and user experience.
- Optimized components and maintained reusable code, enhancing performance and maintainability across the application.

SKILLS

Frontend Technologies

Next.js, React.js, React Native, TypeScript, JavaScript, Zustand, Redux, Context API, React Hook Form, Yup, React Query, Tailwind CSS, styled-components, LESS, Material UI, CSS3, HTML5

Backend Technologies

Node.js, Prisma, PostgreSQL, RESTful APIs, Cloudflare R2

API & Payment Integration

UAE PASS, Stripe API, Google Maps API

Tools & Platforms

Visual Studio Code, Figma, Adobe XD, Asana, Jira, Slack, Xcode, Postman

Other

Version Control (Git), Code Reviews, Agile Methodologies

PROJECTS

Visitor Management System (VMS) | React.js, TypeScript, Tailwind CSS

Developed visitors' portal for visit requests and internal portal with multi-level approval workflows. The admin panel handles system configurations, role and user management, email templates, and blacklisted visitors, while the dashboard provides real-time insights. Integrated UAE PASS, RFID/QR/Emirates ID readers ensure secure, automated verification.

AI PROMPT GENERATOR | Next.js, TypeScript, Tailwind CSS

Developed web application that allows users to create custom AI models that other users can purchase and generate prompts from. The project integrates Stripe for subscription and payment management and Mailgun to automate email notifications, ensuring smooth communication.

LAUNDRY SERVICES APP | React Native, TypeScript, Tailwind CSS

Developed mobile application for customers and vendors that allows users to place orders for ironing, wash, and wash & fold services. Orders are sent to vendors who manage and update their status, while customers can track progress in real time. Implemented a tip system and developed responsive, user-friendly interface built, ensuring seamless order management and enhanced customer experience.

EDUCATION

Bachelor of Science in Computer Science

Oct 2019 - Aug 2023

NED University of Engineering and Technology

- Grade: 3.80 CGPA out of 4
